

Create a Landscape Collage!

A **landscape** is a work of art that shows nature and the environment.

①

Gather a sheet of paper, smaller scraps of paper, scissors, and a glue stick. *Art tip: construction paper, magazines, tissue paper, newspaper, and even recycled paper make great collage materials!*

②

Tear scraps of paper into long strips. Experiment with making your strips as thin as your finger and some as wide as your hand.

③

Arrange your strips of paper on your sheet of paper to create a landscape. Overlap your strips. Which colors should go next to each other?

④

One by one, glue each paper strip to the sheet of paper. Trim the edges of the paper strips that are hanging off the edge.

Is your landscape a real or imagined place? Who might live or visit there?
Tell a story about who might be in your landscape.
