

## **How Artists Create: Virtual Tour Elementary (PreK-5th Grade)**

“How Artists Create” helps students dive deeper into artists’ choices and techniques. The program focuses on the elements of art: line, color, shape, texture, form, space, and value. Museum educators guide students through Artful Thinking Routines and activities from Harvard’s Project Zero. Activities include “line yoga,” investigating the emotions evoked by different colors, and more! Discussions center on the artists’ choices and how those choices create meaning.

### **Essential Question:**

How do artists use the elements of art to create meaning?

### **Learning Targets:**

1. Students identify at least three elements of art in a work of art in the galleries and in a self-created work of art.
2. Students consider why an artist made choices related to the elements of art.

### **Success Criteria:**

- Students can name at least three elements of art.
- Students can point to and name three elements of art in works of art from TAM’s collection.
- Students can explain why an artist may have made a certain choice about an element of art (e.g. why the artist chose a certain color, why the artist chose to use a certain type of line, etc.).
